

# Weblutions Commissions

This document covers all the introductory pricing and guidelines for commissions conducted by Weblutions. Before requesting a commission take the aspects of this document and guidelines in mind.

## What software do we create?

We create multiple types of software products. However, for commissions, we specialize and focus on website creation in both the front-end and back-end, along with this we take a couple of other commission types as well. Commissions we will usually always take on include:

- Static websites
- Dynamic websites (database integrated)
- FaxStore themes
- FaxStore extensions

## What software we don't work on?

There are some areas that we will not create software products in along with some commissions we will *not* take on.

- FiveM resources, we will not create FiveM or most game assets, dependent on the platforms guidelines.
- Already sold items, we will not create content that we already sell as a base, for example, a storefront.
  - If you're looking at a storefront consider getting a theme from us for FaxStore.

We always have the right to not provide service for commissions that our team don't want to take on.

## Prices

As with most commissions prices can vary depending on the needs and wants of the project. However, there is a set of base prices that are defined below.

- Static websites; from \$30
- Dynamic websites; from \$55
- FaxStore themes; from \$25
- FaxStore extension; from \$25

A base hourly rate of \$4.99 applies to all projects which is tracked by actual programming and writing time via typing. This hourly rate will be applied to the final payment - with the programming activity report attached.

When a commission project has been accepted a deposit of half the base price is to be paid before the project works start, this is a non-refundable deposit. On completion, the final payment will be made which contains the second half of the base price along with any hourly rates.
